Entratech Systems celebrates 32 years supplying WIF sensors.

Sandusky, OH: Entratech Systems, a manufacturer of engineered smart sensor and controller solutions built in the USA, is celebrating 32 years of supplying hundreds of thousands of Entratech electronic water-in-fuel sensors and low coolant level sensors to OEM's around the world. Entratech Systems provides FAST design, prototyping, manufacturing and assembly of high, medium and low volume sensor assemblies.

Mike Richardson, President said, " For 32 years, we have earned the trust of major OEM manufacturers because of our innovative thinking, quality control at all levels of manufacturing, and attention to detail. We supply sensors that withstand the test of time, delivering years of unmatched performance."

Entratech specializes in water in fuel sensors for diesel, gasoline and aircraft fuels. OEM manufacturers have relied on the consistent quality of **Entratech** sensor technology for over 32 years. We partner with customers' engineers to help design and build dependable sensor solutions including water-in-fuel sensors and low coolant sensors.

Entratech sensors are used to sense and protect equipment including:

- **On highway Truck Engines**
- **Off-road and Marine Engines**
- **Ag Equipment**
- **Power Generation Equipment**
- **Recreational and Military Vehicles**

Entratech sensors are made and assembled in Sandusky, Ohio about 1 hour west of Cleveland Ohio.
